

# Storyboard

## The Splash Page

- This is where navigators will find a Welcome page that houses 2 buttons and a closing option. The "Participant" and "Administrator" button are for each corresponding party. At the top right of the window will be the closing option in the form of a red x on windows and in the form of a red bubble at the top left on MacOS machines.

## Participant Page

- If the navigator selects the participant button then they will be directed to a unique participant page. The participant page is home to the following actionable events: Create Playlist (button) where a playlist can be created, Show Playlist (Button) which will show all existing playlists, Toggle Playlist (Button) which puts the playlists in a selection mode, Show Segments (drop-down) menu that gives the participant the option to either select remote or local segments, Toggle Segments (Button) which puts the segments in a selection mode, Upload (Button) which gives the participant the ability to upload a segment, Search (Text Field) which allows the participant to search for a specific word(s), Append (Button) which strings segments together, Delete (Button) which serves a dual purpose of either removing a segment from a playlist or deleting a segment from a library, Publish (Button) which allows the participant to publish their work, Home (Button) which brings the participant back to the original participant page saving their existing changes, and lastly a hyperlink-like clickable for each playlist which refreshes the display with the contents of a particular playlist. The exit button is present here also.

## Administrator Page

- If the navigator selects the administrator button, they will be directed to the administrator page. This page has the following actionable events: Show (Button), Toggle (Button), Register (Button), and Mark/Unmark (buttons). The dashes surrounding the squares denote disabled state until a desired action is performed which will trigger the button to be visible. The closing option is consistent with its presence on this page as well
